# Restaurant Management

It is the bill management system developed by AKINSOFT for restaurants, hotels, pastry shops, bars, discos and clubs. Your company will gain corporateness, your work loading will ease off with WOLVOX Restaurant that provides integrated usage with WOLVOX Pre-Accounting and Hotel Programs.

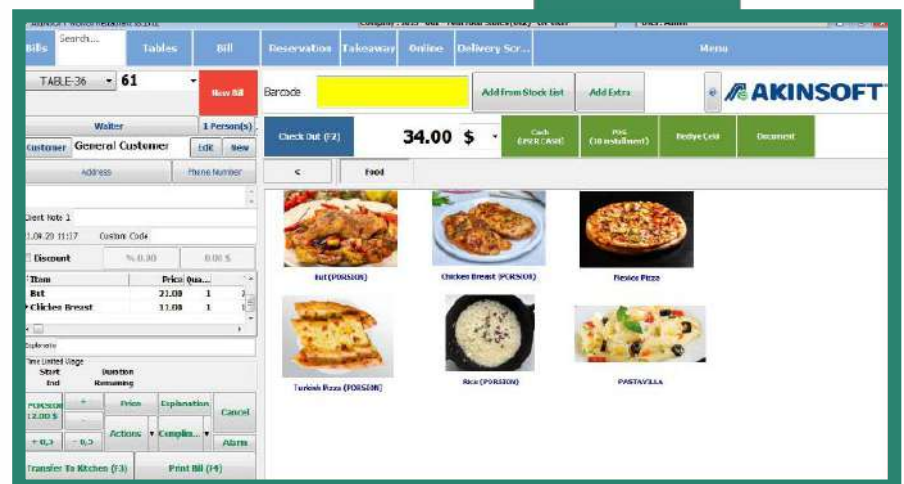

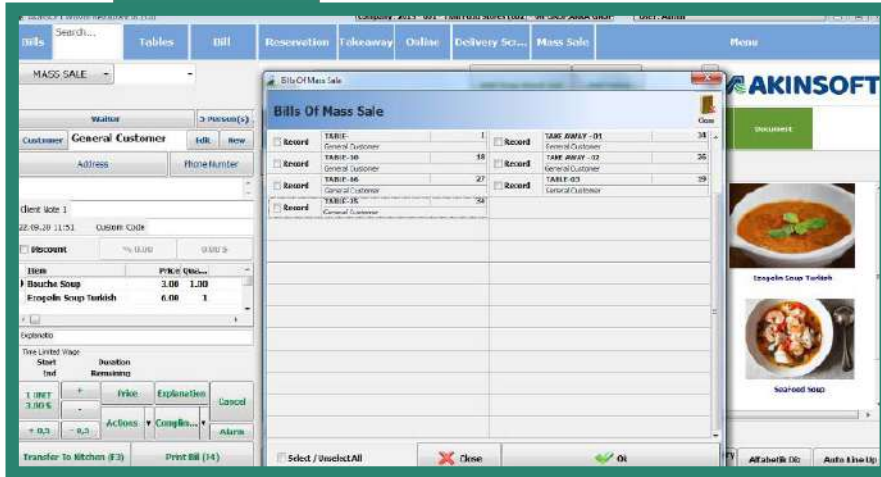

# What will you be able to do?

## Tables and Order Management

WOLVOX Restaurant Program which designed for small or large cafes, pastry shops, restaurants or all companies which need table and customer tracking, provides you to make the table layout as you want, while making you move suitable with the table layout in your restaurant.

- Possibility to layout tables according to their own groups by creating all table groups in your company (garden, upstairs, ground floor etc.)
- Possibility to create table recording fast with collective table entry.
- By independent section definitions, Provides for your waiters to see and make transaction on the tables just in their own authority
- Possibility to make planning for future by getting reservation.
- Visual usage which provides you to distinguish the opened, closed, booked and about to leave tables easily and make transaction.
- Can perform table consolidation and table separation
- Ability to add items by opening a table fast with touch monitor support.
- Possibility of self-service sales by disabling the use of the table.
- Saving time during ordering by creating product groups.
- You can create orders more conveniently and quickly by adding pictures of your stocks.
- In addition to single stock sale, possibility of ordering the items in menu content.
- To be able to offer an alternative proposal to the consumed product by specifying an alternative product.
- Possibility to order according to the units of your products and specify the price difference according to different units (a half portion, half portion).
- Possibility to reflect price differences depending on preference by creating product descriptions (such as with spice-without spice, with sauce-without sauce).
- Being able of Accounting and reporting for the staff who are entitled to the complimentary products.
- By changing the price and quantity on the orders, you can prevent to proceed without entering the description on the quantity decrease.
- Through instant weighing system with TEM online scales via market automation you can get the weight of the product you selected for the bill.

## Self Service – Wholesale

For companies that don't do table tracking, your works become incoherent if complication of your program is added to the especially densities experienced at certain hours of the day. WOLVOX Restaurant Program allows you to process your pending customers quickly without using the table section by Package Sale (self service) usage feature. In addition, you can also make bulk item sale to your selected tables.

- By disabling the table section, you can allow for package service (self-service) transactions.
- You can close all open accounts collectively at the end of the day to avoid instant transaction density.
- At the same time you can open unlimited number of receipts and print individual receipts for the products the customer has purchased.
- With quick menu transition, you can easily access and edit existing orders. You can add an order to all tables with one click by adding products collectively to all open tables or bills.

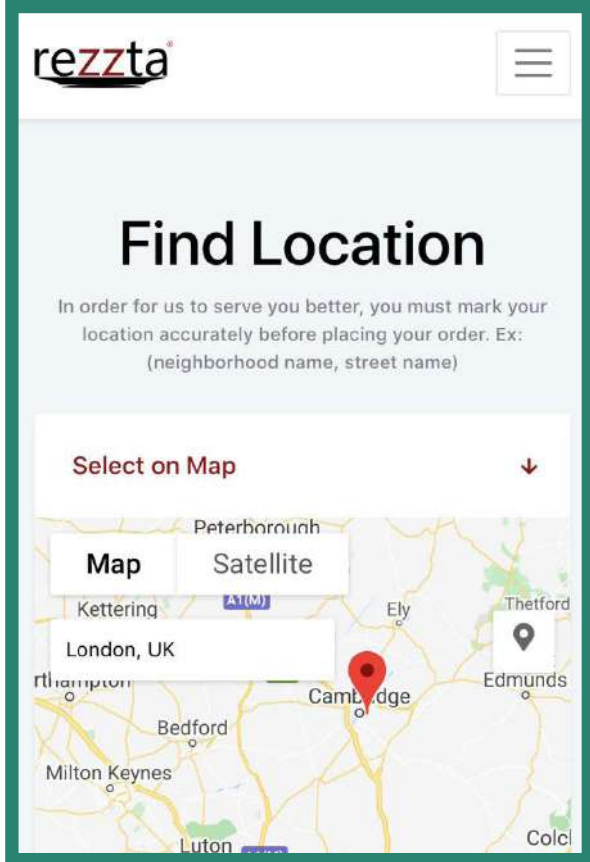

## Reservation

You can prevent confusion between tables by blocking the preferred tables for special days, business meetings or special customers and using the booking screen.

- Ability to register new customer information or make a reservation by selecting from registered customers.
- The automatic end of the blocking period by determining how many hours the table will be used and how many hours the table will be blocked, if your customer does not arrive at the reservation time.
- Ability to book multiple tables for a person or firm.
- Ability to book at preferred tables by checking the reservations that your customers have already made before.
- You can observe the general reservation status of your restaurant by using the reservation chart and prevent to reserve the same table for the second time.
- Ability to make reservations quickly by double clicking on the spreadsheet.

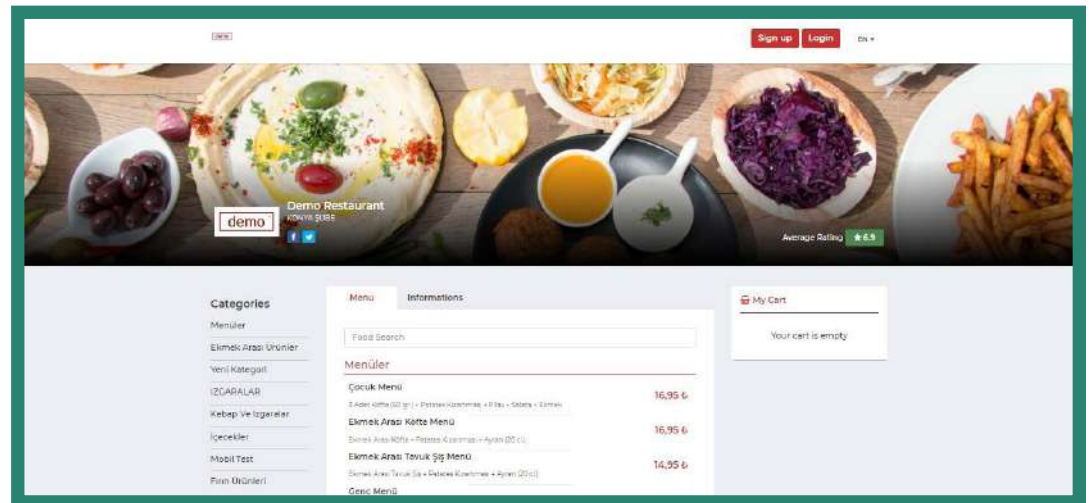

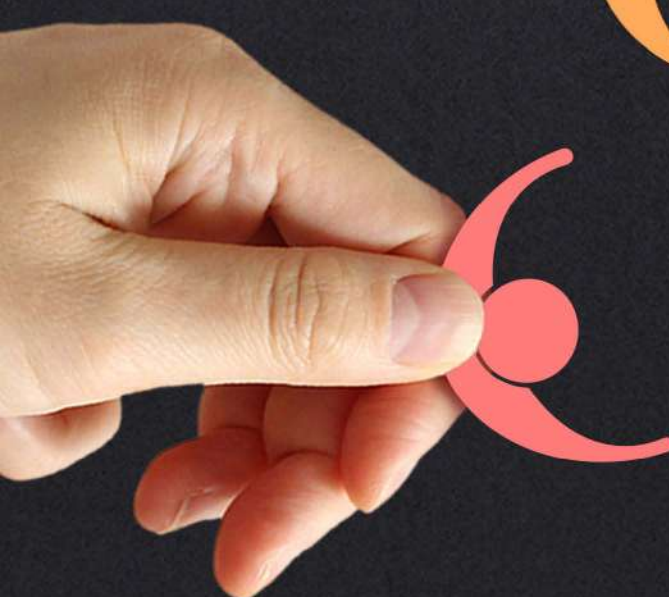

## Caller ID, Online Ordering System and Courier Tracking Panel

Many customers want to order their meal to home, work, or the place where they are, due to time problems or preferences. The solutions offered by WOLVOX Restaurant program regarding these problems are;

- With the support of Caller ID devices, you can know who is calling and can deliver to
- registered addresses without having to obtain the address from your customers every time.
- You can receive a list of calls that called but has not been answered, then you can return the call.
- With the Online Restaurant program, orders can be sent via internet and you can have information about delivery details of orders received.
- With the visual alert feature, you have information about orders received over the
- internet and you can send products without making your customers wait.
- You can utilize from the courier track screen to keep control of your personnel who distribute orders through car or motorcycle.

## Advanced Printing System

WOLVOX Restaurant also offers easy usage to its employees and make them happy as well as offers many advantages to its customers.

- On the kitchen printing system, if you want you can use the printer to forward orders to the kitchen staff, and also
- you can use the kitchen screen with computer that you will have in your kitchen.
- You can send different products that included in an order to their own kitchen, you can use the printing system for each department individually. (E.g. : While Pita goes to the dough kitchen and main meals also can be printed to the related kitchen.)

- You can also print from copy bill printers by using multiple printers in the bill printing system.
- With the official bill printer feature, you can provide orders to be printed from the section you resumed in case you make sub-total and need to add a new product after you print the order.
- For collections that made with the receipt printing system, you can issue a receipt printout.
- If you want, you can also print invoices while the account is closed.
- Instead of the printer, you can use the cash register to make your transactions printed as cash register bill.
- With the advanced printing system, you can make revise in the designs so that they are printed in the desired format.

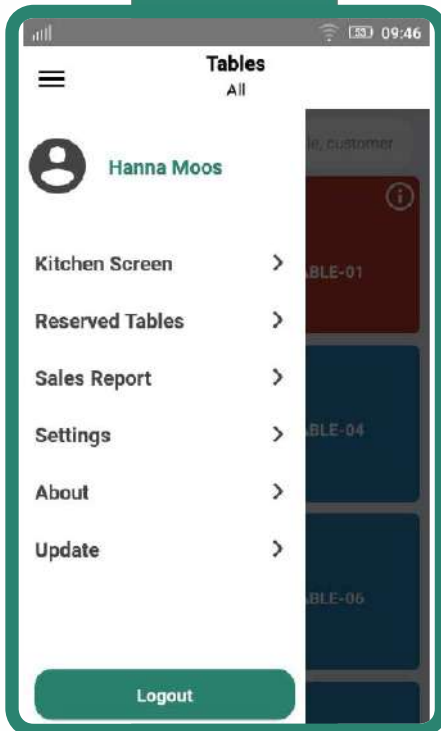

## Waiter Calling System

Another innovation from AKINSOFT WOLVOX Restaurant..

With the Waiter Calling System module, when your customers want they can reach to waiters, waiters can also stand by customers instantly when they want.

- With the “Waiter”, “Account” and “Cancel” buttons on the napkin holder, the possibility to provide the service you give to your customers in a short time
- With the PC connection module, provides full integration with AKINSOFT Restaurant program and when
- the waiter is called, it is possible to see which table the waiter is called from or when “Bill” is requested on the cashier’s screen .
- Possibility to display the call records from LED display panel and from table icons in Restaurant program.
- Ability to speed up your order and account transactions.

## Disco / Bar / Club Entry Screen

With the screen especially developed for disco, bar, club or companies operating with ticket and card loading system at the entrance, you can take customers according to the occupancy values of your business and you can specify the tables of your customers before they enter. You can also hide some tables, such as VIP table, when you want to prevent others to intervene except your authorized waiters.

- With the disco / bar / club entrance screen which can be used by your authorized personnel, you can sell tickets to your customers at the entrance or load to their cards and make them spend as much they have on their cards.
- By making student or civilian distinction, you can price it as you want.
- By hiding the tables you specified, you can provide that only authorized personnel can intervene.
- With the mobile application that you will install to your device with Andoid and IOS operating system, by connecting to facebook and twitter, you can inform application users about disco, bar, club activities, make reservations, send mail or call.

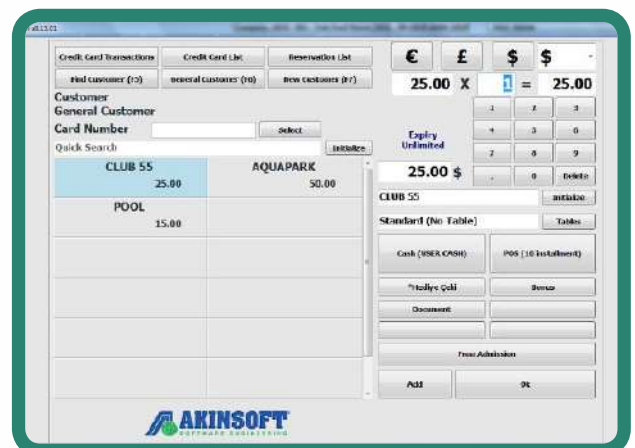

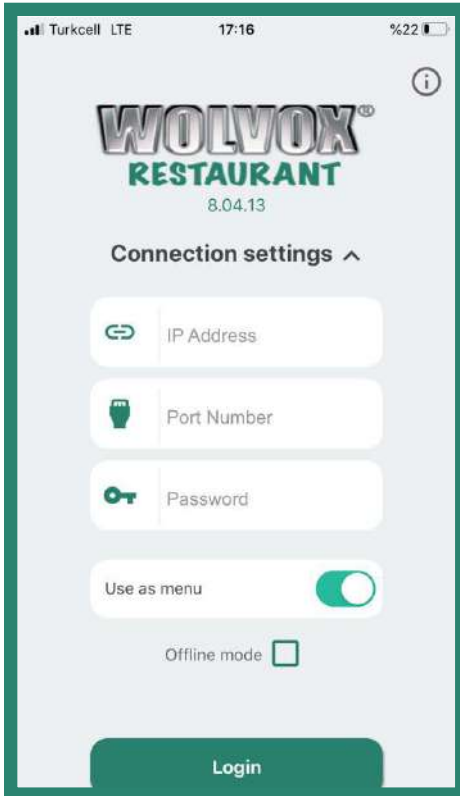

## Card Entrance System

With the WOLVOX Restaurant program “Disco-Bar-Club entrance” screen and Wolvox Data Transfer program’s “Card Entrance System”; you will be able to carry out all your tracking from the areas within the facility that how much they will utilize from, how to control the tourniquet and the stocks to be used within the facility. You can specify the details of the credit bill to be printed by identifying the units in your social facility and specify their prices, in which duration and how many times your customers will utilize from this unit.

You can also specify the VAT rate and its description, which will be charged on the invoicing of the credit bills, to the description and VAT rate fields.

If you will use the system with card readers, you can speed up your member selection by making the necessary settings in the AKS Card Reader System section.

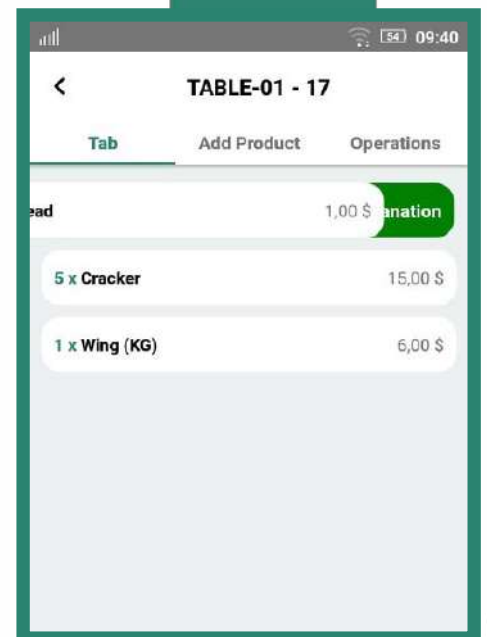

### Restaurant PDA (Windows, Android, IOS)

With the Restaurant PDA module that you buy additionally to the program, from your PDA Device, Android and IOS tablet or phone, you can open the table, order, change the product quantities or add descriptions

- You can make your transactions displayed instantly in your desktop program which you made from your PDA with Windows operating system, IOS or Android operating system devices (Online usage).
- You can remove product cancellation authority for your waiters.
- You can send receiving orders to the kitchen printer or to the kitchen screen.
- You can provide your authorized waiters to close the account.

1,00 x (1,00 TL) Bread	1,00 TL

### Tablet Menu

The tablet menu program, which you will use integrated with the WOLVOX Restaurant program, provides your waiters to promote products to the customers through the tablet menu.

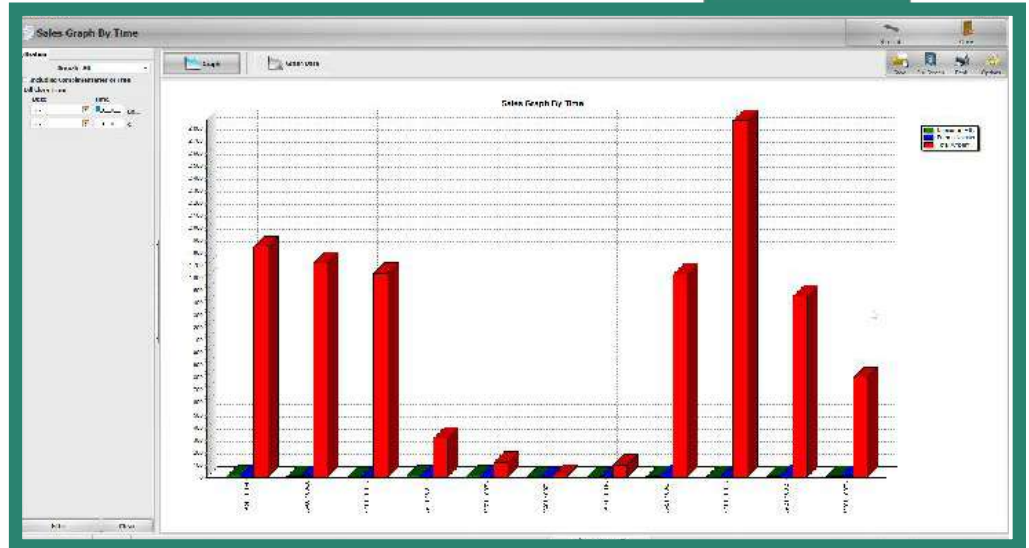

While the customer browse the menu, check the products, get information about the price and image of the products, they can give order easier and elegance of your restaurant is completed.

- Possibility to add images special to the categories and products you want to display on the tablet menu.
- By displaying product prices on product images, you can provide your customers to have information.
- By entering details about the product, you can specify the calorie, the preparation duration and the products that can be eaten and drincken with it.
- Possibility to see other products in the same category on the productselection screen and ability to have preference easier.
- The specified product can be transferred to the order by one button.

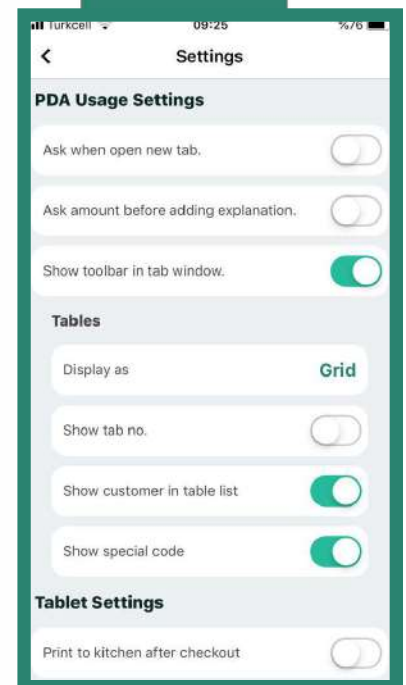

## Restaurant Bill Report – Day End

It is the field where detailed analysis of the sales in the restaurant program can be made. You can also analyze all the factors of restaurant management in this field which you can access from within the WOLVOX Erp Program. Now let's take a look at details;

- Product sales; You can display which product and how much has been sold, with the total quantity and amounts during the day.
- You can make report along with the products in the canceled bills, the total quantity, the total amount and reasons for the cancellation.
- You can display the treat and unpaid product reports and reach to information about which product and who makes the process.
- You can display the sales amounts of the Table Group and also the total sales amounts separately according to the tables.
- Waiter sales distribution, You can report the total sales amounts of your waiters who works in your restaurant, line by line along with the personnel name.
- Reservation Report, It is the field where the general board of your reservation management in your restaurant is shown. Information such as total number of records, number of people, reservation status, estimated income and actual income can be accessed on the board.
- The bills has a summary board view that the restaurant manager uses frequently. According to the status of the bills (opened, closed, canceled, all) you can filter separately, you can view the details of the bill in one line. You can also view other sales of that bill in a separate window before you open and plac the bill in a different place.
- You can view total sales amounts, discounts and grand totals, you can report which transaction type (cash, credit card, multinet, etc.) payments are made.
- Make Day End, you can view how much income comes by receiving day end report of the sales made during the day. You can print the report of the day end, transfer to Ms Office
- Excel - Open office or transfer html and xml.

## Integration

By using WOLVOX Restaurant program integrated with the WOLVOX Hotel program, you can transfer the accounts to guest folio, and with WOLVOX ERP program integration, you can make all of your records and stock tracking from Pre-Accounting program.

- You can use the instant weighing system with the TEM online scales which you make settings in WOLVOX Market Automation.
- By integrating the POS SLIM Customer Screen, you can provide to bedisplayed the customer's product on the bill and the amount payable on the customer's screen.

## Prepaid Working Mode

The WOLVOX Restaurant program can be used as a pre-paid system in addition to its main purpose, making it special for companies operating with membership systems such as social facilities.

- Pre-payment module allows the program to be customized according to the companies with the membership system.
- The product you specified can be used by customers until specific date or for an indefinite period of time in condition of receiving the payment in advance. (In short, you provide your customers to use product A free of charge for an indefinite period of time, or until the last valid date which you specified).
- The product which you specified can be let to use discounted until a specific date or indefinite period, in specific quantity or unlimited quantity.(In short, you provide your customers to use product A free of charge for an indefinite period of time or until the last valid date which you specified, in specific quantity or unlimited quantity.)
